

# NEO

BY CYPHER LEARNING

## BigCloud

A cloud-hosted LMS for your state

# The Evolution of Cloud-Hosted LMS

We believe that there is a natural evolution of the scale of cloud-hosted LMS:

School

District

State / Province

Schools are quickly moving away from hosting an LMS on their own servers to a cloud-hosted LMS such as NEO.

# School Cloud Benefits

Nothing to download, install, or maintain

No need to have server-savvy staff

Cost savings

Access from anywhere, anytime, any device

When enough schools in a district adopt the same cloud LMS, it's a good idea for the entire district to standardize on the same LMS.

# District Cloud Benefits

Share resources between schools

Cross-teaching and cross-enrollment

Collaboration between schools

Only one LMS for teachers/students to learn

Run analytics across all users in district

Administer entire district from single account

Cost savings for bulk purchase

There's no reason to stop at district clouds; all of the schools and districts in a state can adopt the same cloud LMS!

# State Cloud Benefits

Share resources between all districts

Administer state cloud from a single account

Run analytics on all users in your state

Collaboration across your state

Larger cost savings from bulk purchase

# Examples of Resource Sharing

Share standard state curricula standards

Share localized educational materials

Share standardized class templates

Align resources with state proficiencies

# Examples of Collaboration

Subject-specific groups for teachers

Statewide study groups for students

Web conference between schools

Wikis for best practices

Cross-school projects

# Examples of Analytics

Find top 20 math students in the state

Find top 50 teachers by average grade

Find top 100 ranked students

Find schools with low attendance rates

Find districts with high parent satisfaction

Find top 100 students by average grade

# Examples of Administration

Set security policies for entire state

Enable/disable key features for state

Reset passwords for specific district

Bulk import millions of student accounts

Sync system with government database

# Introducing NEO BigCloud

NEO BigCloud builds upon  
NEO LMS, which is:

Massively scalable

Highly reliable (99.99+% uptime)

Easy to use

Works well on all devices

Very cost effective

# NEO BigCloud Special Features

Support multiple districts in the same portal

State-level library

State-level analytics

State-level admin accounts

Significant discounts
